

Virtual Inspection Instructions and Requirements for Plumbing Inspections

Please follow the instructions in the VuSpex GO Offline Field Report User Guide to download and use the VuSpex GO app. [VuSpex GO Offline Field Report User Guide](#)

The Charlotte County Building Department only uses the Offline Field Report functionality of VuSpex GO. **Inspections are automatically scheduled for the following business day.** **You DO NOT need to schedule an inspection prior to submitting an Offline Field Report.**

Once you have downloaded VuSpex GO, refer to the “Checklist of Required Photos” below to upload necessary photos for review. **YOU MUST TAKE THE PHOTOS AT THE INSTALLATION ON SITE** for location verification. Failure to do so, will result in a failed inspection. Once the photos are uploaded into VuSpex Go while at the work site, you may submit the Offline Field Report at any location with a good cell signal.

Checklist of Required Photos

- ✓ Home with address
- ✓ Any opening in the wall
- ✓ Fixture valves
- ✓ Water heater connection
