Charlotte Status

Medium

What Prevention Steps Should You Take Based on Your COVID-19 Community Level?

Low	Medium	High
• Stay up to date with COVID-19 vaccines • Get tested if you have symptoms	• If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautions • Stay up to date with COVID-19 vaccines • Get tested if you have symptoms	• Wear a mask indoors in public • Stay up to date with COVID-19 vaccines • Get tested if you have symptoms • Additional precautions may be needed for people at high risk for severe illness

People may choose to mask at any time. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask. Masks are required on public transportation and may be required in other places by local or state authorities.

Strategy/Updates

Who Can Get a Booster

ELIGIBLE FOR

1 Booster

Everyone ages 12 years and older can get 1 booster after completing their COVID-19 vaccine primary series.

Learn when you can get your 1st booster below.

ELIGIBLE FOR

2 Boosters

- Adults ages 50 years and older
- People ages 12 years and older who are moderately or severely immunocompromised
- People who got 2 doses (1 primary dose and 1 booster) of Johnson & Johnson's Janssen vaccine

Learn when you can get your 2nd booster below and what you should consider.

- CDC updates community level guidelines based upon transmission of COVID-19.
  - CDC County Check tool added to web.
- Mid county test site open.
- Multiple therapeutics available on state web page.
- Continue testing and vaccination strategies.
- Additional booster available for ages 50+.
- Continue rapid Infection control assessments.
- Vaccination efforts continue. (75% total pop 5+)
- Continued focus on ILI and respiratory illnesses.
- Continue to monitor unmet needs and respond appropriately.
- Federal site for home tests. https://www.covidtests.gov/

CDC Guidance

When to Stay Home

Calculating Quarantine

The date of your exposure is considered day 0. **Day 1 is the first full day after your last contact with a person who has had COVID-19.** Stay home and away from other people for at least 5 days. Learn why CDC updated guidance for the general public.

IF YOU Were exposed to COVID-19 and are NOT up to date on COVID-19 vaccinations	Quarantine for at least 5 days **Stay home** Stay home and quarantine for at least 5 full days. Wear a well-fitting mask if you must be around others in your home. Do not travel. **Get tested** Even if you don't develop symptoms, get tested at least 5 days after you last had close contact with someone with COVID-19.	After quarantine Watch for symptoms Watch for symptoms until 10 days after you last had close contact with someone with COVID-19. **Avoid travel** It is best to avoid travel until a full 10 days after you last had close contact with someone with COVID-19. **If you develop symptoms** Isolate immediately and get tested. Continue to stay home until you know the results. Wear a well-fitting mask around others.	Take precautions until day 10 **Wear a well-fitting mask** Wear a well-fitting mask for 10 full days any time you are around others inside your home or in public. Do not go to places where you are unable to wear a well-fitting mask. If you must travel during days 6-10, take precautions. Avoid being around people who are more likely to get very sick from COVID-19.
IF YOU Were exposed to COVID-19 and are up to date on COVID-19 vaccinations	No quarantine You do not need to stay home **unless you develop** symptoms. **Get tested** Even if you don't develop symptoms, get tested at least 5 days after you last had close contact with someone with COVID-19.	Watch for symptoms Watch for symptoms until 10 days after you last had close contact with someone with COVID-19. **If you develop symptoms** Isolate immediately and get tested. Continue to stay home until you know the results. Wear a well-fitting mask around others.	Take precautions until day 10 **Wear a well-fitting mask** Wear a well-fitting mask for 10 full days any time you are around others inside your home or in public. Do not go to places where you are unable to wear a well-fitting mask. Take precautions if traveling Avoid being around people who are more likely to get very sick from COVID-19.
IF YOU were exposed to COVID-19 and had confirmed COVID-19 within the past 90 days (you tested positive using a viral test)	No quarantine You do not need to stay home **unless you develop** symptoms.	Watch for symptoms Watch for symptoms until 10 days after you last had close contact with someone with COVID-19. **If you develop symptoms** Isolate immediately and get tested. Continue to stay home until you know the results. Wear a well-fitting mask around others.	Take precautions until day 10 **Wear a well-fitting mask** Wear a well-fitting mask for 10 full days any time you are around others inside your home or in public. Do not go to places where you are unable to wear a well-fitting mask. Take precautions if traveling Avoid being around people who are more likely to get very sick from COVID-19.

Calculating Isolation

Day 0 is your first day of symptoms or a positive viral test. **Day 1 is the first full day after your symptoms developed or your test specimen was collected.** If you have COVID-19 or have symptoms, isolate for at least 5 days.

| IF YOU Tested positive for COVID-19 or have symptoms, regardless of vaccination status | Stay home for at least 5 days
Stay home for 5 days and isolate from others in your home.

Wear a well-fitting mask if you must be around others in your home.

Do not travel. | Ending isolation if you had symptoms
End isolation after 5 full days if you are fever-free for 24 hours (without the use of fever-reducing medication) and your symptoms are improving.

Ending isolation if you did NOT have symptoms
End isolation after at least 5 full days after your positive test.

If you got very sick from COVID-19 or have a weakened immune system
You should isolate for at least 10 days. Consult your doctor before ending isolation. | Take precautions until day 10

Wear a well-fitting mask
Wear a well-fitting mask for 10 full days any time you are around others inside your home or in public. Do not go to places where you are unable to wear a mask.

Do not travel
Do not travel until a full 10 days after your symptoms started or the date your positive test was taken if you had no symptoms.

Avoid being around people who are more likely to get very sick from COVID-19. |

CDC Healthcare Worker Guidance

Work Restrictions for HCP With SARS-CoV-2 Infection and Exposures

"Up to Date" with all recommended COVID-19 vaccine doses is defined in Stay Up to Date with Your Vaccines | CDC

For more details, including recommendations for healthcare personnel who are iimmunocompromised, have severe to critical illness, or are within 90 days of prior infection, refer to Interim Guidance for Managing Healthcare Personnel with SARS-CoV-2 Infection or Exposure to SARS-CoV-2 (conventional standards) and Strategies to Mitigate Healthcare Personnel Staffing Shortages (contingency and crisis standards).

Work Restrictions for HCP With SARS-CoV-2 Infection

Vaccination Status	Conventional	Contingency	Crisis
Up to Date and Not Up to Date	10 days OR 7 days with negative test†, if asymptomatic or mild to moderate illness (with improving symptoms)	5 days with/without negative test, if asymptomatic or mild to moderate illness (with improving symptoms)	No work restriction, with prioritization considerations (e.g., types of patients they care for)

Work Restrictions for Asymptomatic HCP with SARS-CoV-2 Exposures

Vaccination Status	Conventional	Contingency	Crisis
Up to Date	No work restrictions, with negative test on days 1‡ and 5–7	No work restriction	No work restriction
Not Up to Date	10 days OR 7 days with negative test†	No work restriction with negative tests on days 1‡, 2, 3, & 5–7 (if shortage of tests prioritize Day 1 to 2 and 5-7)	No work restrictions (test if possible)

†Negative test result within 48 hours before returning to work
‡For calculating day of test: 1) for those with infection consider day of symptom onset (or first positive test if asymptomatic) as day 0; 2) for those with exposure consider day of exposure as day 0
